

Dokumenti - tipologija znanstvenih in strokovnih dokumentov

Tipologija je način razvrščanja dokumentov, in sicer predvsem glede na obliko (knjiga, samostojno poglavje oz. sestavek v knjigi ali zborniku s posvetovanja, članek v reviji, patent, standard ...) ali glede na znanstveno oz. strokovno poglobljenost (znanstveni prispevek, pregledni prispevek, strokovni prispevek...). Tipologija ni določena absolutno, pač pa je odvisna od značilnosti stroke, informacijskega sistema ali zbirke, lahko pa tudi od zahtev ustanov, ki tipologijo uporabljajo z namenom razvrščanja ali vrednotenja dokumentov.
